Hey Bears!

We have several improvements at the mansion.

First, Don W. donated a beautiful little-used Kitchenaid convection range with a glass top that is beautiful. I know ... where is the picture. Well, picture it in your head or better yet come and see it in person with your reservation to Bearidise! I've also installed a new (old) range hood that was purchased 10 years ago and was never installed by our contractor. It is beautiful, effective, and has great halogen lights in it.

We have also done a major upgrade in Internet services and we now have a connection that is about 15 times faster than our old connection! So you should see a big difference in performance.

Many other improvements are coming soon!
